

# Roaster Restoration Service

We're experts in reducing emissions  
to lower the environmental impact

# Why restore?

Purchasing a new roaster can be a significant financial burden, especially when you're looking for a high-quality machine. **Restoring your old roaster is a cost-effective solution that will give you the same, if not better, performance.**

Our team of skilled craftsmen are experts in the field, and will carefully disassemble, clean, and repair your roaster, ensuring that it **works like new again**. We understand the importance of your roaster to your business and that's why we take the restoration process seriously.

As time goes by, components in your roaster may become worn or damaged, increasing the risk of accidents or breakdowns. **Oil accumulation with other contaminants can also affect the flavor and aroma of your coffee.** But with our restoration services, we can ensure that all parts are in good working order and remove any contaminants to retain the **signature taste and aroma of your coffee.**

In addition to ensuring high production volumes and saving on energy costs, restoring your roaster also helps reduce waste and prevent more resources from being used to manufacture a new appliance. **It's a smart investment that will ensure safety, costs and produce consistently high-quality coffee.**

**At Voltumachine, we offer a guarantee for all our restoration services**

# Why you should trust us to restore your roaster

- **World-wide support:** With headquarters in Copenhagen and technical teams in Europe and America, we can meet your needs quickly anywhere in the world.
- **Expertise:** Our team has extensive knowledge and experience in all types of coffee roasters. We know the ins and outs of each make and model, and can quickly identify any issues and provide the best solution.
- **Quality Workmanship:** We pride ourselves on providing top-notch workmanship and attention to detail. We use only the best quality parts and materials to ensure that your roaster is restored to its original specifications.
- **Certification:** Our maintenance team is certified and prepared to comply with legal, technical and administrative regulations, regardless of which country you are in.
- **Time-efficient:** We understand that time is money, and that's why we work quickly and efficiently to get your roaster back up and running as soon as possible.
- **Cost-effective:** We understand that restoring a roaster can be a significant investment. That's why we work with you to provide cost-effective solutions that fit your budget.
- **Warranty:** We provide a warranty on all of our restoration services to give you peace of mind and ensure that your roaster is in good working order for years to come.

**Contact us today to schedule your restoration**

# Our service includes:

- Repair / Replacement of any damaged parts
- Maintenance / Replacement of electrical, and mechanical components
- Gas burner control
- Cleaning important areas
- Emission report

The process starts with a thorough assessment to identify any issues. Any damaged parts are repaired or replaced with new, high-quality components to guarantee the roaster's longevity and functionality.

The gas burner of the coffee roaster is taken apart for a thorough examination of the nozzle wear. The strength of the ignition spark and the condition of the flame detector are evaluated. The stability of the gas system is assessed by measuring internal pressure and detecting potential gas leaks.

Thermographic images of the combustion chamber are taken to correct and minimize energy waste.

We guarantee the correct restoration of the roaster,  
with a more sustainable roasting.

## We also offer maintenance for your:

- Chimneys
- Air compressor
- Coffee grinder
- Packaging machine

## As well as:

- (Dis)assembly,  
manipulation and  
installation of machines  
and equipment
- Deep cleaning

As we promote efficient, sustainable processes  
we add value to your product while reducing the carbon footprint together.

## Sustainability focus

We know the importance that businesses have in the fight against climate change, and this is why we offer **personalized emissions report**, which includes a report with proposals for improvement so your company can continue on the path of sustainability and energy efficiency using the available resources.
